**RICE CLOUD SORTING**  
**QUALITY SOLUTIONS**  
**ULTRA-HD PREMIUM**  
**NEW ERA OF AI QUALITY SORTING**  
**COMPREHENSIVE UPGRADE**

# Introducing World's Best CLSORTING TECHNOLOGY TO INDIA

World's 1<sup>st</sup>  
4-color **RGBW** imaging

32% higher brightness in high cont  
78% less color noise in low light

A deep  
inspection  
at the  
application  
lab of the  
results before  
bringing it  
to the  
market

Kinetic ensures that  
all the new developments  
are thoroughly checked and  
verified before it is released  
to the market.

Every single grain is  
important to us and we  
do a deep analysis  
for the benefit of industry.

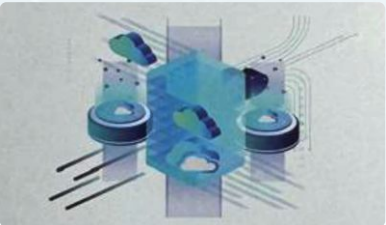

**JXO** CLOUD QUALITY SORTING SOLUTIONS

New Solutions of Jiexun Rice Cloud Quality Sorting  
To provide more professional and reliable rice sorting solutions  
for high quality customers.

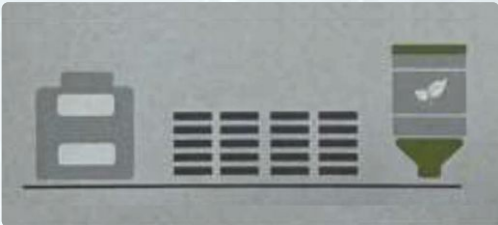

**PLOV Platform 2.0**

Ensure that the materials in the channel  
are evenly laid without stacking during  
high-speed falling of sorted materials.

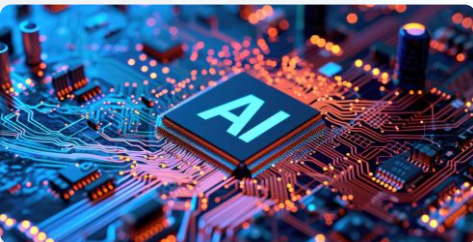

**Intelligent Control System**

Closed loop control system for  
production line efficient linkage.  
Leading the era of unmanned 3.0  
intelligent factories.

**Independent Environmental Purification  
Technology**

Independent environmental purification  
technology ensures that the sorting accuracy is  
not affected by factors such as dust during the  
production and processing.

Large AI models for sorting industry and super  
computing power platform intelligent dynamic  
adaptive sorting of materials. Artificial  
intelligence leaps from image recognition to  
understanding and judgment levels. Building a  
qualitative universe where 'everything can be  
sorted'.

Large AI models for sorting industry is  
a leap from artificial intelligence  
'recognition' to 'understanding'  
**AI Quality Sorting Large Model**

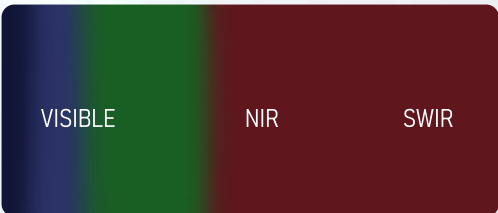

**Hawkeye Camera  
Technology 3.0**

Bionic hawkeye recognition  
technology 3.0 High speed dynamic  
recognition.

**Noise Reducer**

1st time in colour sorting technology-  
around 80% noise reduction in  
low light.

**MPF Multi-pixel Fusion Technology**

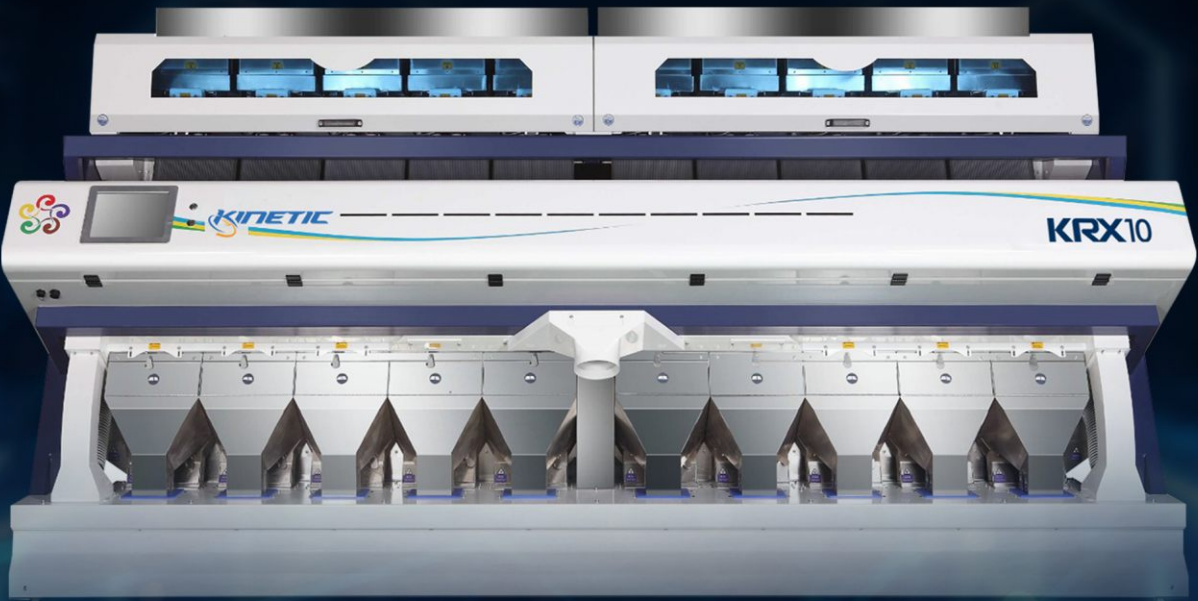

Based on the characteristics of infrared spectra  
of different substances. different substances  
are essentially distinguished.

**Smart Dust Handling Design**

1st time in colour sorting technology-  
around 80% noise reduction in  
low light.

**KRX** SERIES

Better Value realisation of rejects.  
More Final packed rice.  
Highly stable machine.  
Fully automatic product sorting parameters.

**JXO** CLOUD QUALITY SORTING SOLUTIONS

Ultra HD-RGBW camera technology has the best detection power which is backed by “NOISE REDUCER” feature results in purest form of detected signals which are processed as packages and ensures 100% receiving of signals through parity check software and ejects only the defect grains. A MARVAL PERFORMANCE! Unbelievable sorting performance with great product stability.

We are confident - you will rate this product as ★★★★★

TECHNICAL PARAMETERS

MODEL	Power (kw)	Dimension LxBxH (MM)	Weight (kg)
KRX 8	220V/50HZ	3380x1671x2044	2050
KRX 10	220V/50HZ	4100x1671x2044	2800

Remarks: \* 20mm Tolerance is acceptable by real calcutation.
